

You can get on with the
business of doing...

OUTSOURCING

"Your success is our success. And one of the best ways we can contribute is by relieving you of the time consuming accounting jobs that stop you focusing fully on growing your business."

Vipul Shah, Head of Outsourcing

You can get on with the business of doing your business by leaving us to manage the myriad of detail involved with maintaining the books of account, and to deal with the regulatory authorities and issues such as VAT registrations, PAYE and tax returns.

We pride ourselves on our ability to provide a seamless, convenient and cost effective service.

Experience, the difference

A growing media and film company required timely management information in order to successfully manage their growth. However, a lack of co-ordination and communication between the in-house bookkeeper and the outsourced accountant meant that management accounts were unacceptably delayed. Carter Backer Winter took charge of both functions, resulting in the client receiving quarterly management accounts within three weeks of each quarter end. This allowed them the opportunity to make the time sensitive adjustments necessary for their business to flourish. The added bonus was the cost efficiencies created.

Time saving and efficient

A busy legal practice was so successful that the fee earners no longer had time to prepare the required books of account. The practice outsourced their bookkeeping and payroll services to us. Our efficient team now also provides them with a broad range of services including the maintenance of the accounting records, preparation of the quarterly VAT return and production of the monthly payroll. In addition, we keep the client up to date regarding their creditors (including PAYE and VAT), thereby allowing them to manage their cash flow more effectively than ever.

Convenience and global access

Due to rapid expansion, a client was required to travel overseas regularly and no longer had sufficient time to adequately manage the routine bookkeeping, VAT and payroll functions. On our advice, he implemented an online accounting package which allowed our team to provide the bookkeeping services, whilst giving him the added bonus of being able to access the data from anywhere in the world.
